

PHOTOGRAPHY ASSIGNMENT

Research and answer the following questions. Type them up in WordPerfect and put your name on the page. This project should take one class.

1. Photographers work with line, texture, shape colour and pattern. A good thing to remember is to make sure you keep the photograph uncluttered and present the subject clearly. Find two photographs on the Internet that demonstrate the important rule of "**Filling the Frame**". Insert them in your word document.
2. Another important rule is the rule of thirds.

The photograph on the right is more appealing because the sea plane is located where the lines cross. Research and explain the rule of thirds to me.

3. If you take a photograph and don't follow the rule of thirds what is one way you can fix it?
4. Locate 5 different photographs insert them in your document and write a few lines explaining why the photographs are appealing to you. What rules do they follow?
